

Empowering Teams to Mitigate Supplier Risks at Scale

Supplier stability is key to business resilience. When they falter, operations and customers suffer. Many organizations face lengthy assessments and weak audits that slow response and raise exposure. Proactive companies use structured Supplier Risk Management for early action and continuous improvement.

osapiens HUB for Supplier Risk Management delivers full visibility across the supplier network, helping teams identify and address risks early. It combines end-to-end monitoring, configurable assessments, and automated workflows. Custom dashboards and real-time tracking help prevent disruptions, ensure audit readiness, and protect customer trust.

Managing Risks and Measuring Success

Designed to bring transparency and ensure supply chain continuity, **osapiens HUB** lets companies define custom risk dimensions and assess suppliers against company and industry policies. Automated workflows, sanctions monitoring, and AI-powered news tracking enable early detection of emerging risks, helping teams act faster and uncover new opportunities.

Structured, Transparent, and Actionable Risk Management

The **osapiens HUB for Supplier Risk Management** transforms supplier risk management into a methodical, proactive process.

Gain Control Over Your Supplier Risks

With always-on monitoring, multitier visibility, and automated workflows, you gain full transparency into supplier risks – from compliance and sanctions to emerging threats. Act proactively, mitigate disruptions, and unlock hidden growth opportunities across your supply chain, with osapiens HUB for Supplier Risk Management.

Always-on monitoring – Continuous scanning of sanctions lists, public records, and AI-curated news keeps supplier risk current and triggers immediate action.

Multitier visibility – Map all supplier tiers to uncover hidden vulnerabilities and focus mitigation where it matters.

Transparent, explainable scoring – Risk scores link directly to their sources, creating a shared understanding across procurement, legal, and compliance.

Automated workflows & case management – No-code workflows turn alerts into auditable actions, eliminating manual follow-ups and ensuring accountability.
